REVERSE STRESS TEST

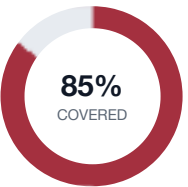

5-day break point vs. actual concentration

Finding: the fund's largest distributor (41.0% of NAV) exceeds both the waterfall break point (37.5%) and the fire-sale break point (12.5%), bound by the 50-day UK AIM holding. A single platform decision exceeds this fund's capacity to respond without either forced selling in individual names or material degradation of the residual portfolio.

NON-REDEMPTION LIQUIDITY

5-day stressed margin & collateral

Total stressed demand **£100.9m**
of which: counterparty declines to roll £40.0m
of which: variation & initial margin £56.1m
of which: repo haircut widening £4.8m
Available eligible collateral £86.1m
Shortfall £14.8m
